

Survey of New Teacher Induction Week Technology Session.

Please reflect on your attendance at the New Teacher Induction Week Technology Session.

1. Name:

Elem/MS/HS:

Subject or Grade Level:

For the following questions you could select:

YES / NO / I don't remember

2. Did the username and password you were given allow you to access the computers during the workshop?
3. Were you able to access the myLearning Plan website and register for the first day of District In-service?
4. Did you create your PPI D during the workshop? This is the ID number to use when registering for in-service training.
5. Were you able to access the CV Staff Page?
6. Were you able to access the Sapphire Gradebook during the workshop?
7. Were you able to access your email using Web Outlook?
8. Did you submit your information for an IU#13 Medianet account? This information generates your username for United Streaming.
9. Did you request a Moodle Webpage from Dave Solon to use with your students?

This question was open ended with room for comments.

10. Please list your future technology in-service ideas? Would you like training on Moodle, United Streaming or other technology tools?

This survey was created using Survey Monkey

<http://www.surveymonkey.com/Default.aspx>. This free tool was helpful in gathering the responses from the participants. You need to set up a free account or login with an existing account.

Survey Respondents:

17 of 22 in attendance at the induction technology workshop responded.

3 of who were unable to access their network user account and spent the remainder of the session watching others work.

Responses to open ended question #10

10. Please list your future technology in-service ideas? Would you like training on Moodle, United Streaming or other technology tools?

1. I thought the amount of information in the session was good but a little more "play time" would have been better. Plus my Learning plan didn't work for me so I didn't get to sign up for anything, so I missed that information. To go back and do it then on my own will be difficult.
2. I would love to receive both the equipment and training for the student response system in my classroom.
3. Training for sapphire grade book and report cards closer to the report card time. If we are trained in August, most of the information has been forgotten by November when first report cards are due.
4. More information about Moodle would be helpful. Also, Dave Solon came to Brownstown to do a mini lesson on using gradebook. While he was here he gave us his personal link to a page that links you to any of the website a cv staff member might use. This little piece of info was so helpful since it is very difficult to remember all the web addresses for the various pages. It might be a good idea to give this information out to everyone as it really saves time and frustration.
5. I feel pretty confident with moodle, though an 'advanced' course would I'm sure be useful. I don't know anything about United Streaming. I am interested in yackpack, a free software tool for voice messaging.
6. Keep all the usernames and passwords the same, rather than having a different one for each.
7. United Streaming Moodle
8. My password did not work, so I spent most of the time sitting there watching other people.
9. I think the tech training went well!
10. I would love further training on smart board training. I currently use it daily but know there are other ways and would love a couple hours instruction to make certain I am using it to its full potential.
11. United Streaming
